DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-17 and 19-21 are rejected under 35 U.S.C. 102(b) as being anticipated by DE29718483 (cited by the applicant.

Regarding claim 15-16, DE discloses an earpiece comprising a shank (14, Fig. 1 or 30 and 32 Fig. 5); an angled traverse segment (15 and see page 6, last paragraph); and a broadened portion (otologic device 20) disposed on the angled traverse segment configured to hold a flexible signal conductor (a signal conductor reads on any electrical wire within the otologic, i.e. a hearing aid) in an upper region of the auditory canal and to prevent the conductor from covering a portion of a lower region of the canal (the hearing aid 20 is held to the canal without covering the lower region of the canal (see Fig. 1).

Regarding claims 17 and 19, the broadened portion of the earpiece of DE shaped as a tab (20) and is less than a diameter of the canal.

Regarding claims 20-21, DE further discloses a second shank (the portion of 15 that extend below parts 20 and 30, Fig. 5).

Art Unit: 2643

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE 29718483.

DE fails to disclose that the earpiece is for use with cochlear implant microphones.

Official Notice is taken that cochlear implant microphones are usually mounted near the ear to pick up external sound. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the earpiece of DE for mounting any suitable hearing devices, including mounting the microphones of a cochlear implant near the user's ear as an alternate supporting means.

Allowable Subject Matter

3. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2643

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
